Warehouse & Logistics Facility Maintenance Solutions

Safe, Stable, and Efficient Floors—Delivered by Poly-Mor Canada

In warehouse and logistics environments, uneven slabs, rocking panels, and cracked joints create safety risks, equipment wear, and costly downtime. Poly-Mor Canada restores and stabilizes concrete floors quickly using advanced geotechnical polyurethane—without interrupting operations.

Constant forklift traffic and heavy racking systems put extreme stress on concrete floors. Over time, the subgrade settles, creating voids, cracks, and uneven surfaces. This can result in reduced safety, higher maintenance costs, and shorter floor life. Common problems include:

- Sinking or rocking slabs
- Trip and fall hazards
- Forklift vibration and wheel damage
- Voids beneath slabs
- Cracked or spalled joints

OUR SOLUTIONS

Panel Stabilization: Voids are filled to support concrete panels, eliminating the rocking caused by forklift traffic.

Void Filling & Soil Stabilization: Densifies weak soils and strengthens bearing capacity beneath heavy-load areas.

Control Joint Filling & Repair: Durable polyurea fillers create smooth, sealed joints that resist chipping, spalling, and debris.

Concrete Lifting & Leveling: Precision polyurethane injection lifts settled slabs, fills voids, and restores support—traffic resumes within minutes.

Surface Repairs: Fast-setting materials fix chips and spalls for quick return to service—often within an hour.

Poly-Mor Canada Inc.

WHY FACILITIES CHOOSE POLY-MOR CANADA

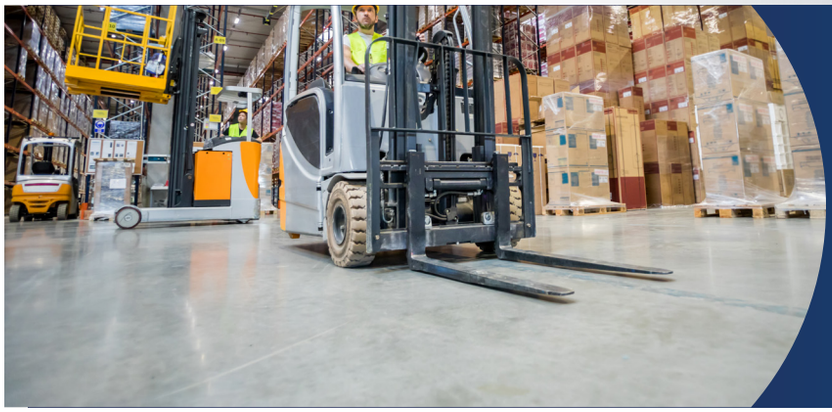
Eliminate Trip Hazards: Smooth, level transitions improve safety and compliance.

Protect Equipment: Stabilized floors reduce forklift vibration and wear.

Extend Floor Life: Joint repair prevents edge spalling and damage.

Improve Hygiene: Sealed joints simplify cleaning and block dust and water.

Minimize Downtime: Rapid-curing materials allow same-day operation.



THE POLY-MOR ADVANTAGE

- Non-disruptive installation
- Precision injection technology
- Clean, eco-friendly process
- Permanent, non-shrinking results
- Trusted expertise nationwide

PROTECTING YOUR INVESTMENT

Concrete floors are the foundation of your business. Poly-Mor Canada helps warehouses and logistics facilities maintain safer, longer-lasting floors.

GET BACK TO BUSINESS—FAST

Contact Poly-Mor Canada Inc. today to schedule a site assessment and restore your floors—safely, cleanly, and efficiently.
